

GRADE CONTROL

WINTER INSPECTION PROGRAM

MAINTAIN YOUR EQUIPMENT, MAXIMIZE YOUR PRODUCTIVITY

Like any machinery, ensuring you get the most from your machine control and positioning solutions is equally important. Our certified technicians will thoroughly inspect your **SmartGrade™** and **Topcon** equipment, provide recommendations, and advise you on how to keep your equipment running in peak form to maximize system performance.

You may bring your machine and equipment to the closest **Murphy Tractor & Equipment** location, or if you prefer, we can schedule one of our certified technicians to come to you.

For questions about the Inspection Program or to Request an Inspection, please contact **1-833-990-9200**

Machine Control Systems:

- Inspect installation, cables & harnesses
- Verify that components & sensors are connected and communicating
- Check firmware/software versions
- Review machine geometry hydraulic calibration
- Verify system performance

Positioning Technology Solutions (offboard equipment):

- Check that Satellites are tracking
- Review Radio channels and settings
- Verify Radio/Bluetooth/Cellular communication
- Check firmware/software versions
- Validate calibration (lasers/total stations)
- Function test

Certified Repair & Warranty Facility:

Our Trained and Certified Technicians can troubleshoot and repair your equipment - from GPS, Levels, Machine Control, Total Stations, and more. Murphy Tractor can help maintain and service your equipment to maximize productivity and accuracy.

With advanced tooling available, you may drop off or ship us your equipment. We will evaluate the issue and provide you with an estimate for repair and expected turnaround time.

*If, upon further inspection of the damaged or defective component, it is determined that the defect was due to customer negligence, it will not be covered under the manufacturer's warranty.

** Program (valid through March 31st 2024).
